React
Express

Tools and other

SVN
Webpack
Mocha
Cypress

EXPERIENCE

Front end developer, T-Systems — 2017 to present

Developing single-page application for complaints and transport management for Daimler AG. I started project as only frontend developer in the team and was responsible for design, implementation and testing. Successfully implemented the application from scratch using Dojo Toolkit to production. Introduced unit testing with Mocha, automated functional test with Cypress, building with Webpack, Maven and Jenkins. Successfully on-boarded two new frontend developers providing mentorship, code review and pair programming.

Software developer, T-Systems — 2013 to 2017

Worked as a front end and ARS developer in the international team on a large project for Deutsche Telecom AG. Responsible for development of new features including estimation, technical design, documentation, implementation and testing. Successfully delivered about hundred new features involving both backend and frontend tasks.

Software developer, Bank Sankt Peterburg — 2012 to 2013

Took part in the development of a CRM system solution for banking service as .Net and SSRS/SQL developer through the whole lifecycle, from requirements definition to successful deployment. As a result I successfully integrated MS Dynamics CRM with Remote Banking System using WCF web-service, designed and developed a number of reports for MS SQL Server Reporting Service.

Software developer, Danske Bank Russia — 2011 to 2012

As a freelance developer I worked on a CRM solution for banking service from the analysis of business needs to production deployment. I successfully customized Microsoft Dynamics CRM, developed extensions and plugins using C# and JavaScript. Also I performed an integration of MS CRM with core banking system based on dbms Progress and initial data migration from various sources.
